

# User Profiles

## How do I see profile views?

You can see total profile views and who has viewed your profile in the last 30 days.

- Go to your profile from the main screen top right person icon or by clicking on any thumbnail or link of your name.
- Click on the profile menu in the righthand corner (3 dots)
- Then in the profile menu, select Profile views

**Note:** If the users account is set to Anonymous browsing in account settings then they will not show up in your profile views list. However they will still count against the total amount of views received.
